Accomplishments

- Rework GUI
- GUI Keyboard
- Fix delay and reverb bugs
- Tuned delay values
- Added safety limiter
- Cleaning up and refactoring code
- User's manual documentation
- Github repo cleanup and organization

Future Improvements

- Polyphony
- LFO
- Preset Browser

This Week's Plans

- N/A

Risks / Help Needed

- In the end I wasn't able to figure out polyphony, but that is a good stretch goal for future work on this project
